

March 22, 2019

Dear Parents,

It was wonderful to meet with you and your child at parent/teacher/student conferences. I hope that you were impressed with all that your child has been learning in second grade. They were all so excited to share Leadership Notebooks and published reviews with you, along with their other great work. We will continue to work on our goals in school and I ask that you continue working with your child at home. Take some time this weekend to celebrate all that your child has already accomplished! Children today are expected to learn far more than children were expected to learn just 10 years ago. It is only through our partnership, teachers and parents working together, that our children can be successful students. Your support is greatly appreciated!

We will begin a new science unit on Monday to learn about sound and light energy. In this unit we will investigate the fundamental principles of sound and light generation, how sound and light travel, and some physical characteristics of the energy forms that we call sound and light. This is an exciting unit for students that involves active investigations. Ask your child each day what he or she is learning about sound and light. Watch for a few related homework assignments to come home during this unit.

Save the date of Tuesday, May 7th. This is the date of our concert, "Let Your Light Shine On Me!" The performance will be at 7:00 p.m. at North High School Performing Arts Center. We are working hard to learn our songs!

Enjoy some family time!

Sincerely,
Mrs. Glenda Lassiter
